

SPORTident-Card10

July 2012

SI-Card 10 is a member of the third generation of SI-Cards.

SI-Cards10/11 and SIAC complete the punching cycle in about 60ms. This is nearly twice as fast as SI-Card8/9, the most advanced SI-Cards so far.

SI-Card11 comes in different coloured tips and a transparent body.

The high punching speed and the large memory size, able to store up to 128 control records, make the SI-Card 10 the perfect choice for the ambitious runner.

Specifications

	SI-Card10
Model type	Finger stick
Number range	7,000,001 ... 7,999,999
